Alvic Feel the Tech Power

YOUR DAY TO DAY IN THE HANDS OF THE BEST INVENTORY AND ONLINE PURCHAISING CONTROL SYSTEM

ALVIC TMIC™

01. Adaptability

Alvic's 35+ years of market experience are reflected in the Alvic TMIC inventory control.

02. Sturdiness

All components of the terminal are designed to operate in a constantly moving and industrial environment.

03. Ease of use

A system that allows greater control of your purchases and receipt of material.

Features

INV3
- So that the control of inventories does not mean interrupting the daily activity and allows a real and comprehensive control of the stocks of warehouses and stores.
- PDA-based suite with scanner integration and Wifi technology, and the INV3 (online inventory control) program suite.
- Possibility to take inventory without interrupting the sale.
- It has several possibilities, product registrations, transfers between warehouses, etc.

CMP3
- For a greater control of purchases and receipt of material.
- You can make purchase proposals.
- Making orders.
- Merchandise receipt control, etc.
- Both applications are accessing the Octan Office database in real time.

Design
- Avant-garde and ergonomic design.
- High brightness display.
- Reduced design and very manageable.

Operability
- Multi-station, multi-warehouse and multi-terminal licenses.
- Real-time online inventory by directly accessing the Octan Office database.
- Proposal for purchases that can be integrated directly into Octan Office.

Functionalities

INV3
- Automatic packaging identification System (units, boxes, pallets).
- Online inventory (without interrupting the sale).
